

Holiday Revision and Exam Preparation for February Half-Term

Subject:

Key Advice for Exam Preparation / Revision	Complete past exam papers at home and use mark schemes to check your answers. Make sure to work on applied AND pure, not just the one you like best. Maths Club is in Ma7 every Wednesday after school if you need advice from a maths teacher
Activities to complete	Your teacher will give you an exam paper to complete over the Christmas break. You do not need to do it in timed conditions at this stage. Look up things you have forgotten as this is part of your revision.
Online Resources	www.Mymaths.co.uk (leonards / fourteen) https://www.desmos.com/calculator https://www.wolframalpha.com/ (doesn't work on school computers but will on your phone or personal computer) https://www.symbolab.com/ to check your algebra as it gives step by step solutions.
Key Reading	Be familiar with your formula booklet so you know which formulae will be provided and which you need to learn.
Link to Exam Board Past Papers	https://www.physicsandmathstutor.com/maths-revision/a-level-aqa/papers/ The other exam boards have the same specification if you want extra practice but focus on AQA first.
Other	Make sure that you are confident using your graphical calculator. These are a huge advantage in the exams but only if you know how to use them.
